

Filter media perfected.

**BrightLine**<sup>®</sup>  
FILTER MEDIA PERFECTED.

# Engineered for better filtration.

From Harsco, a world leader in upcycled materials, BrightLine isn't just a new kind of filter media — it's the best.

Certified to  
NSF/ANSI Standard 50

**Filters 6x better than sand**

BrightLine catches particles as small as 5 microns.

**Requires 20% less product**

With a lower density, BrightLine fills more space with less material.

**Can last 3x longer**

BrightLine does not break down like sand filter media.

**Backwash is quick and efficient**

BrightLine doesn't pack or channel, saving water and chemicals wasted in backwashing.

**100% recycled materials**

BrightLine is eco-friendly before you even use it.

## Chemical Composition:

SiO<sub>2</sub>: 73%      Al<sub>2</sub>O<sub>3</sub>: < 2%  
Na<sub>2</sub>O: 13%      MgO: < 1%  
CaO: 10%      K<sub>2</sub>O: < 1%  
< 1% crystalline silica

## Technical Data:

Effective Size: .52mm – .72mm  
Uniformity Coefficient: 1.69  
Bulk Density: 80 lbs/ft<sup>3</sup>
